

Digital Product Architect

Addition digital product studio - part of Campaign top 40, strategic creative agency WPN Chameleon – is looking for an experienced, enthusiastic and self-motivated Digital Product Architect to help join our friendly, supportive and sociable team.

Addition work with some of the biggest charities in the UK – including NSPCC, BHF, Alzheimer's Society, RSPCA, RBL & UNICEF – creating exciting digital products, transactional websites and online donation platforms.

Our growing team is looking for a driven Digital Product Architect, with a passion for user experience, business processes and digital solution design. Working alongside clients and internal teams you will work to define industry leading digital solutions. You will be the solution owner and have to manage conflicts and priorities as we move from project definition to delivery. You will work across multi-disciplinary teams to gather functional and non-functional requirements, ensure deliverables meet specified quality requirements and deadlines, and measure the results and successes of our projects. You will be confident in running workshops and hosting a senior audience through often complex processes. You will be a real self-starter with a keen eye to detail.

Key responsibilities & activities

- Define, document and communicate detailed business requirements with internal and external stakeholders
- Facilitate client workshops in order to capture functional and non-functional requirements
- Document as-is and to be process diagrams, detailed requirements and specifications
- Work closely with UX, creative, digital marketing specialists and developers during solution design

- Discuss and document acceptance criteria with examples
- Conduct demonstrations of developed solutions to project stakeholders
- Support the production team through build as issues arise
- Functional and technical test the solution
- Input into the processes and tools used through projects
- Determine and agree quality procedures and standards

Key skills/competencies required

- Knowledge and experience of technical aspects of digital solution
- Experience identifying and documenting functional and non-functional requirements
- Experience leading requirements gathering sessions with project teams and clients
- Evidence of a strong attention to detail
- Good presentation skills
- Excellent problem solving and analytical skills
- Exceptional listening, written and verbal communication skills
- Ability to work independently, and more importantly, within a team

Advantageous skills/competencies

- Knowledge of the user experience and creative design process
- Experience of working with/in the third sector
- Experience and transactional systems and payments solutions
- Experience creating meaningful agile user stories
- Wireframing & prototyping
- Experience writing Cucumber scripts

Benefits

Competitive salary plus 27 days holiday, duvet days, life insurance, training budget, discounted private healthcare, cycle to work scheme, discounted home computer scheme, childcare vouchers.

About us
